Background

[Article 102.017\(f\)](#), Code of Criminal Procedure, requires a local administrative judge to submit a written report to the Office of Court Administration (OCA) regarding any incident involving court security that occurs in or around a building housing a court. A security incident is defined as any adverse event that threatens the security of a person or property, or causes or may cause significant disruption to functions of the court due to a breach in security.

The purpose of the Security Incident Report is to collect concrete, quantitative information about the frequency and nature of the security threats facing the judiciary.
