Re: TFSC Complaint No. 19.08; Story, Allan Latoi (SWIFS; Forensic Biology/DNA)

Dear Mr. Story,

This letter is to let you know that the referenced complaint was dismissed for failure to state an allegation of negligence or misconduct connected to performance of a forensic analysis in your case. Commission staff contacted SWIFS and requested your case file. It appears the victim's autopsy and toxicology testing were performed there, but no DNA testing on evidence was done by SWIFS. All material was returned to the Waco Police Department.

This commission's jurisdiction is over forensic analyses performed in crime labs accredited in Texas. Since no DNA analysis was done in your case by the subject laboratory, there is nothing this commission can investigate. TFSC has no authority to order testing of any kind in any case. The laboratories test only what their clients ask them to test and do not perform analyses outside those parameters.

Should you determine an analysis was performed in a different laboratory, you are free to file a new complaint against that entity. Thank you and let me know if I may be of any additional assistance.

Sincerely,

A handwritten signature in black ink that reads "Kathryn Adams".

Kathryn Adams
Commission Coordinator
