Re: Texas Forensic Science Commission ("TFSC") Complaint No. 20.39; Johnson, Jerry
(DPS Lubbock; Hair Microscopy)

Dear Mr. Johnson,

Dear Mr. Johnson,

At its July 16, 2021 quarterly meeting, the Commission voted to refer your case to its Hair Microscopy Review Team. Team members review case material and determine if there is enough information to conclude whether a positive, probative association was made concerning the subject hair. If members conclude that case information reviewed is insufficient to make such a determination, they will request additional case documentation.

Once all material is collected and reviewed, members will determine whether the relevant testimony exceeded the limits of the applicable science in your case. You will receive notice from this commission when the review team completes its review of your case and makes a final determination. This process may take several months. Thank you.

Sincerely,

A handwritten signature in black ink that reads "Kathryn Adams". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Kathryn Adams
Commission Coordinator
Texas Forensic Science Commission
