Q2: How do you use your court's data?

Most Common JP Data Requests

- Landlord/Tenant Statistics (Eviction)
- Debt Cases
- Magistrate Warnings
- Arrest Warrants Issued
- Fines & Court Costs

Austin rents are falling. So why are eviction filings still at record highs?

The city wants to explore ways to help tenants avoid evictions, as the number of filings continues to reach record highs

 BY SAM STARK
AUGUST 28, 2026

“The number of eviction filings across Austin and Travis County [has repeatedly reached record highs](#) over the past several years, and 2026 is on track to continue the trend. [Building and Strengthening Tenant Action](#), or BASTA, said there have been 10,732 eviction filings as of late August 2026, about 900 more than at the same point in 2025. Housing advocates say housing costs and inflation are continuing to strain renters, while a siloed system of programs aimed at supporting people at risk of eviction has done little to improve the situation.”

Recent Data Request

Hello,

I hope this email finds you well! I have been manually pulling the Justice Courts reports (Justice Court Activity Detail) by county, precinct, and place for the time period from September 2013 to September 2025. Is there any easier way to do this or could you provide me with an aggregated file that has this information? Below is an example of the breakout that I'm looking for and a list of the specific fields. If you need any additional information, let me know. You can also call me at 813-505-7040 if that's easier.

Thanks in advance for your help!

Best,
Caroline

Coming in 2027 – New Judicial Directory System

In 2026 OCA began working on a new directory system to replace the current online system last updated in 2010.

CURRENT SYSTEM	NEW SYSTEM
Court has 1 ID and 1 password.	Court can have multiple authorized users.
Only judge information is collected.	Will allow court clerk user access and roles.
Court staff must submit updates to OCA via email.	Users will be able to maintain court and judge information <i>themselves</i> .
Judicial Directory is siloed and does not connect to other OCA sites.	Portal will allow users secure access to other OCA reporting.

Q7: What Judicial Directory features would be helpful for your court?

Coming Soon - Court Analytics TX (CATX)

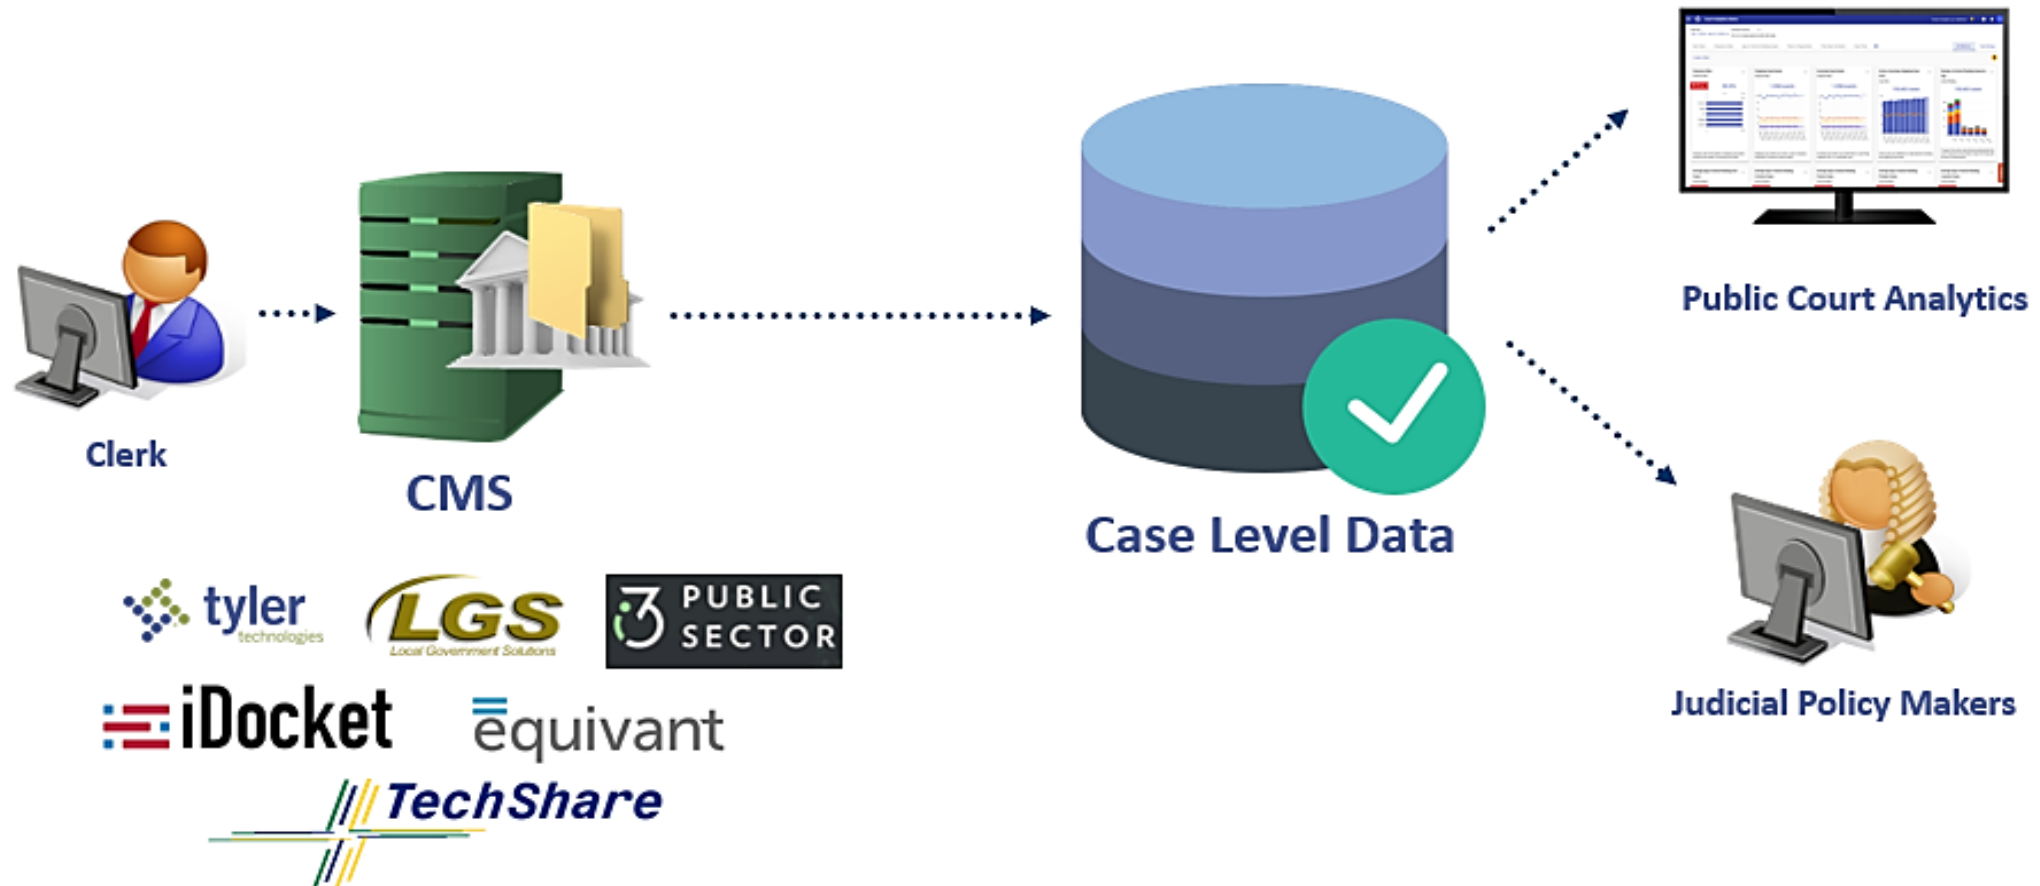

During the 88th Legislative Session, OCA Received funding to contract with a vendor to build a new statewide system to collect **Case-Level Data**. In September of 2024, a contract with OCA and Tyler Technologies was finalized to develop the system.

The purpose of this system is to design, implement, and maintain a robust statewide data warehouse and business intelligence system that will serve as a repository of court case level data for all court levels and case types across the State of Texas.

How It Works - Integrated

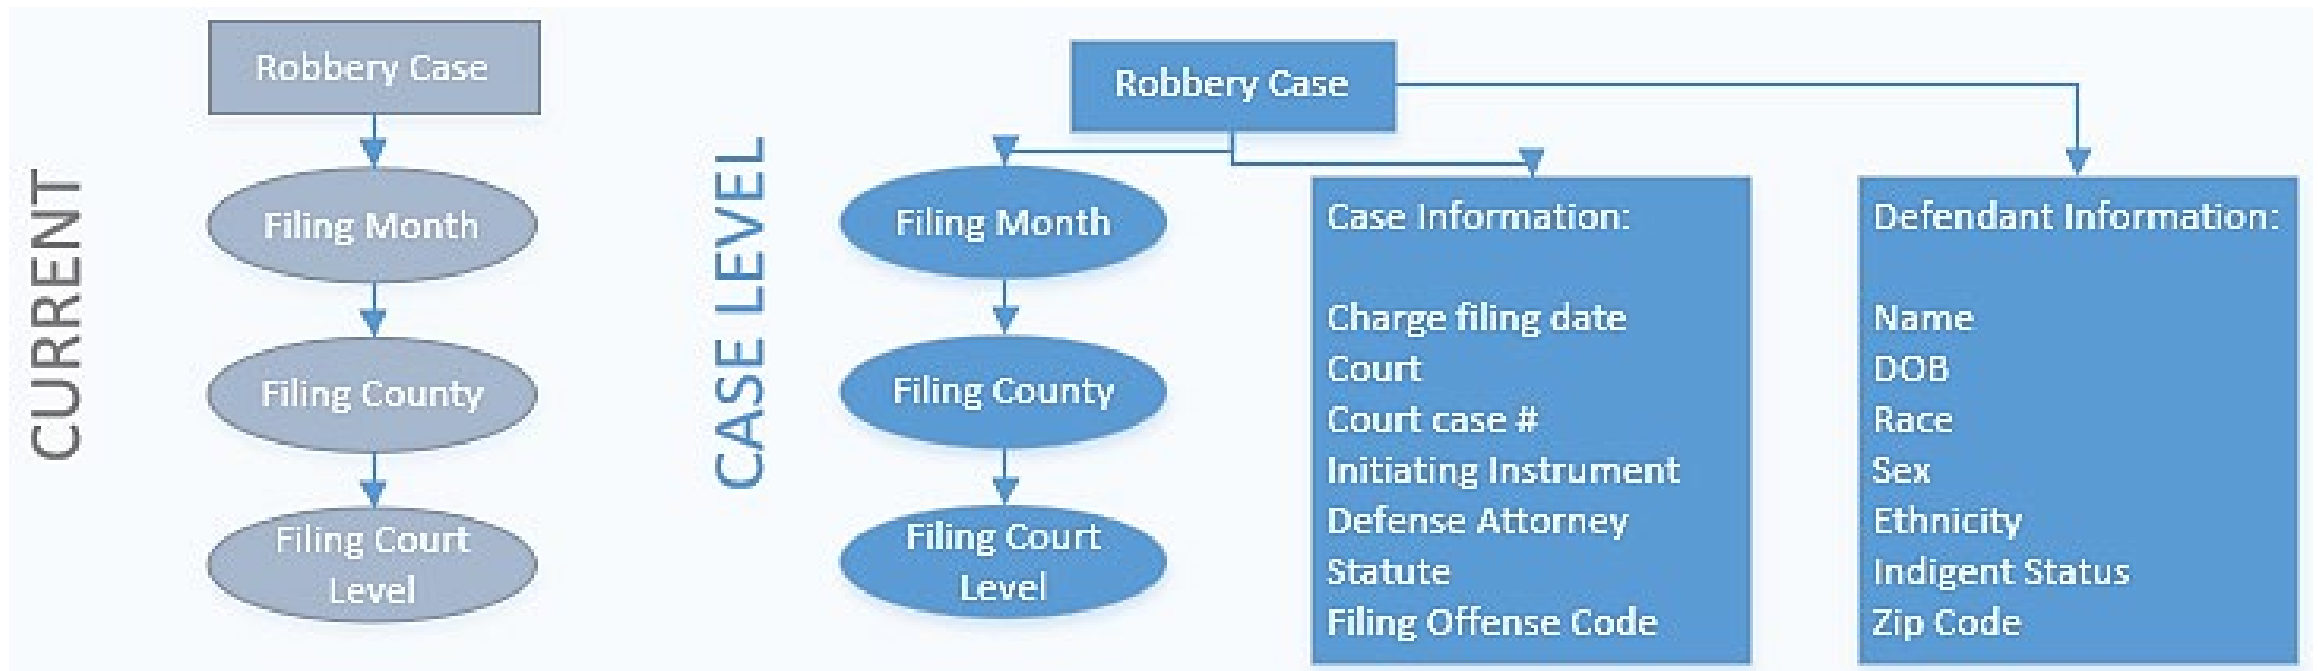

LR

CATX Data Collection

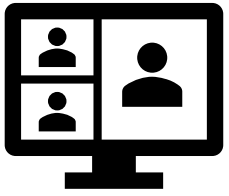

LR

Example:

OCA is in the process of developing policy to guard PII (Personally Identifiable Information).

CATX System Development

LR

- ❑ **A standardized table** of case filings, dispositions, statistical closures, events, etc. will be established to provide a tool for mapping and reporting your case data through CATX.
- ❑ **Integration** will provide the ability for CATX to securely connect to specific fields in your case management system and pull the necessary data directly from your system, without requiring any reports to be submitted on your end.
- ❑ The **end goal** is to eliminate the requirement for the clerk to submit manually or electronically the OCA Monthly Court Activity Reports, with additional reporting requirements reviewed and evaluated during later phases of the project to see if they can be eliminated.
